The surname TERRY means 'son of Theodric', the personal name Theodric being derived through the Old French Terri, from the Old German Theudoric, 'people rule', which being abbreviated became Terry.

Once everyone was known by a single name but this led to confusion and so an extra name was adopted. Thus, a man named John whose father was Terry (properly Theodoric) might be known as 'John (son of) Terry', the additional name eventually becoming hereditary as a surname.

Early records mention John Terry in the Assize Rolls of Warwickshire in 1221, Richard Terry of Huntingdonshire and Geoffrey Terri of Oxfordshire appears in the Hundred Rolls of 1273.

Edward Terry (1590-1660) was a celebrated travel writer and published many works.

Among early emigrants from England to America was John Terry who is recorded as a landowner in Virginia in 1642. Eli Terry (1772-1852) was a noted American clock maker.

The arms illustrated may be described heraldically as: Argent a cross between four martlets gules; Crest: A demi lion proper holding in its paw a fleur-de-lis gules. Writers of the past have attributed symbolism to the tinctures and charges of heraldry - thus, argent (silver) is said to denote Sincerity and gules (red) Magnanimity. The peculiarly heraldic bird, the martlet is usually likened to a footless swallow and is a very popular charge in English armory.

FOREWORD

When I started copying the census data of the "Terry Family" many years ago, it was not my intention to ever publish my information. I had not intended to copy anymore census than was necessary to track my own line. About four years ago, someone whom I had corresponded with over the years, suggested I put all my work in a book and have it published. At the time I had completed only the Al.-Ms.-and Ga. census because that was the only film our Library had in their collection. Only the 1850 census was indexed, so I spent hundreds of hours reading through over 200 counties in each decade beginning with the 1860 through 1920 census searching for a "Terry". Sometime a whole day of reading films would yield only a few families. If I were going to publish the "Terry" census, I decided I would have to copy every southern and border state census from 1790 through 1920. Little did I realize the enormity of this task. The 1860 and 1870 had not been indexed. After I had spent so much time on the 1860 & 1870 Al.-Ms. and Ga. census, someone in each of those states put out a book listing all of the families in each county. Soon the Tenn. families would be published for the 1860 and 1870 decade. I bought a secondhand, broken reader from the local library, repaired it and started to rent film, about 30 to 40 rolls at a time. I rented only the ones that had been indexed by "The American Genealogical Lending Library". Each year a few more rolls of film would be indexed. The 1870 IL. IN. and OH. and the 1910 IN. has not, as yet been indexed.

After four years of work and much money, I finished in late Dec. 1994. One more task remained... 634 pages, over 17,000 records, and over 2 million keystrokes had to be proofread. These two volumes do not contain "text" in the ordinary sense, but are made up of numbers, counties, names, abbreviations, periods, etc. It took over 200 hours involving intense scrutiny and entering the corrections into the computer data base. I believe my books are 95% free of errors, However, after saying this, I must tell you, there are names that defy logic. It was not uncommon for the census taker to spell the same name differently in each decade. I have a "Name Book" that was of great help. Some of the names you will see can possibly only be deciphered by a member of that particular family.

There were many census that could not be read or were of such poor quality as to make identification perilous. I tried to reconstruct these families using the previous and the next decade and the very extensive files I have on a great many of the "Terry" families from other sources. There will be mistakes. In such circumstances, the reader can use the page and family number, go to the library, and it will take only a few minutes to locate that family.

Most of the readers of these books will understand the enormous satisfaction one gets when conducting research on his or her family tree. Every discovery is like a successful treasure hunt. Even after twenty years I, sometimes try to objectively understand this feeling of exhilaration.

During the years of collecting information from the census, I changed format two or three times, hopefully improving the way my data is presented. Of course the census from one state to another was often recorded differently by the census taker. In some instances, the person's birthday was shown as "the year of birth", but most of the time the "age" was shown. Depending on the date the census was taken and the birthday of the individual, some of the ages will be off by a year. In a great many of cases, the ages given were so inaccurate from decade to decade, it was very hard to find the truth. I added information when possible to my census collection that was not ever shown on the Federal Census, such as the wifes maiden name and date of her marriage, and information I had received from many sources. I believe this additional information will be of great importance to the researcher.

There are some explanations in order, concerning the way I presented some of the census material.

ITEM #1-EXAMPLE: JAMES B1826ALNCVA. OR JAMES B1826AL/NC/VA. MEANS: JAMES WAS BORN IN AL. HIS FATHER WAS BORN IN NC. HIS MOTHER WAS BORN IN VA.

ITEM #2-EXAMPLE: HENRY 65VA. ---MARY----------63NC.
[JOSEPH 29VA.]-SARAH 267VA.-JOHN 25VA.-[MARY 23VA.] MEANS:
THE FOUR ABOVE WERE CHILDREN OF HENRY & MARY, THE ONES THAT HAVE A BRACKET AROUND THEIR NAMES WERE NO LONGER LIVING AT HOME.

ITEM #3-EXAMPLE: JAMES B1858ALA. OR JAMES B1858AL. MEANS: AT THE BEGINING OF MY CENSUS TAKING I USED THREE LETTER ABBREVATIONS FOR SOME OF THE STATES, THEN LATER ON I USED ONLY TWO LETTERS.
